### Discogs

*Team Size: 6*

The Discogs mobile app provides access to one of the world's largest databases of music releases. It allows users to discover detailed information about artists, albums, vinyl records, CDs, and other music formats. Through the app, users can search millions of releases, view tracklists, check release history, and explore artist discographies.

In addition to music discovery, the app also functions as a global marketplace where users can buy and sell records and other music media. Collectors can catalog their personal music collections, track the value of their items, and maintain a wishlist for records they want to purchase. The app also provides notifications about price changes and marketplace updates.
